

CNG PRODUCTS

1" stage reducer with filler entry, pressure gauge with indicator, tank mounted for added safety.

Double stage reducer with gas solenoid valve with filter.

CNG tank (CCOE approved) with manual valve.

Pipes set.

Switch with wire harness (dual fuel option).

Mixer with complete accessories.

Oil pump for 2 stroke engine.

Our Mission

Maximum auto conversion for a Clean, Green & Eco-friendly way of life.

CONSTANT INNOVATION

We at "Leader Auto Gas" are constantly improving our products by incorporating the latest ideas and material based on latest international stringent Norms & Practice i.e. Conformance of Product (CoP).

We have developed a very selected vendor base, who in turn are supplying us international standard materials, which keeps our quality on constant high.

All components are developed using CAD-CAM systems. All our products are manufacturing by using CNC machines.

**SAFE
ECONOMICAL
LOW MAINTENANCE
ECO-FRIENDLY
LONG LIFE**

After spreading miles of smiles to a largest segment of satisfied customers with our LPG auto conversion kit.

We at "**Leader**" have developed world class CNG conversion kit with constant improvements incorporated by our in house R&D department. Because of using prime quality raw materials our kit is accepted and certified by A.R.A.I. and ISO - 15500. Safety and economy are the main trust areas in our development programme. Our kits are safer as they meet Govt. norms, economic on your pocket, gives better mileage and most importantly are trusted by people.

WHY CNG?

➤ CNG is clean fuel which is non toxic and good air mix- ability, no additives therefore the combustion is near perfect and practically non polluting.

➤ CNG is also the cheapest viable alternative fuel source found abundantly in nature globally and giving numerous advantages.

➤ CNG being lighter than air, dispenses quickly without any accumulation. The ignition temp. of CNG is higher than liquid fuels so it reduces the danger of accidental or spontaneous ignition.

➤ CNG causes no oil contamination result - increases oil life.

➤ CNG has higher octane value result - better start and regular smooth running of the engine.

➤ CNG does not form sediment on the spark plugs result - longer spark plug life.

➤ CNG combustion eliminates to a great extent harmful gas emissions, less smoke than conventional fuels result - added life to exhaust system.

➤ CNG conversion makes clean air possible as much less pollutants are released into the atmosphere result - no pollution and contribution to lowering long time adverse affects like **green house** effect and **global warming** which are presently alarming and must be reduced immediately.

➤ Complete combustion of CNG takes place, which is emission free (Co-Co₂, So₂ & Nox) compared to conventional fuel.

➤ CNG costs are lower, performance higher, increasing mileage thus saving around 65% of fuel expenses.

➤ The highlight of auto conversion are many fold. The conversion process firstly does not tamper with the basic characteristics of your petrol engine. What we effectively do is provide an alternative fuel source which is compact and fits into your vehicle with minimum alteration to your existing system.

➤ These conversion kits have to pass stringent tests by autonomous body like A.R.A.I. & V.R.D.E. (Govt. of India undertaking). In order to that they may be fitted to your vehicle. It can be fitted in a few hours time, which assure you substantial saving in each and every kilometer.

➤ Leader kits are A.R.A.I. approved according to ISO-15500 standards with CCOE approved tanks, which are very safe due to stringent testing methods adopted. We also find acceptance under ISO-15500, which is the international bench mark of a quality conversion kit.

➤ The conversion kit is energised at the flick of a switch and can be reconverted to a conventional petrol by turning on the switch to petrol mode if the necessity arise. The switch is mounted on the dash board for convenience.
